Mary Collier Stars In Showboat

City Praises

Commissioners Consider Pay Raises

James Clay

For Service

The cast for "Showboat" has been announced by Phil Kelley, director of Troy State University's opera workshop. Performances will be presented at TSU in Small Auditorium on July 30th and 31st. "Showboat" is a musical comedy based on the play by Eugene O'Neill. It was adapted for the stage by Oscar Hammerstein and Jerome Kern. In the play, many musical numbers were replaced on the school board when his last term expired and he asked not to be re-appointed.

The resolution, which was introduced by the Mayor and five commissioners, was voted out of the Whereras, and Therefore, and is summed up below:

The city fathers have a deep respect for capable leadership and after careful consideration they feel James Clay has exhibited the qualities of leadership over the years on the school board. They admire and thank Clay for his leadership and the advice he has provided. The council believes that Clay has shown genuine concern for enhancing the quality of life for the citizens and children of Elba.

Marker To Be Unveiled Tuesday

The historical marker, centrally placed on the Elba Courthouse lawn, will be dedicated next Thursday at 11:00 a.m. by the Elba City Council, made by Roy Shoffner, of Enterprise, president of the Pea River Historical and Genealogical Society.

The cast of characters includes: Winslow Ed Warner, Steve Landry, Bill Petrie, Bill Shreve, Queenie Jackie Mann, Parthy Anne Hawkes, Pam McGee, Captain Andy, Mr. Lester, Mrs. Dorothy, Deborah Lynn Long, Frank, Art Densmore, Fallon, Dr. Brooks Thomas, Mrs. R. R. Rawls, Glenn Havens, Magnolia, Mary Collier, Julie, Margie Dueitt, Joe, Jenny, Sam, Mrs. Schaeffer, Mrs. Mann, Mrs. Caldwell, Job, Dr. Gerald Baxter, Landlady, Lance Headley, Jim, Dr. Tom, Mrs. Jackson, Mrs. Bishop, Charlie, Miss Dusitt, Mother Superior, Sister Mary Edwin Spisak, Kim, Gretta Kantor.

The Dorsey Corporation (NYSE), leading manufacturer of glass and plastic containers and cargo trailers, announced record sales and earnings continue to increase.

Net sales for the six months ended June 30, 1974 of \$78,873,000, an increase of 22% over the first half of 1973, repre-

sented another record level.

Net earnings of \$1,947,000 are well ahead of the \$1,270,000 reported last year. This represents a 53% increase and earnings continue to increase.

**BRAINSTORMS**
With Farris Cox

Donnie Parker is apparently trying to prove to me and the world that he catches just as many fish as he claims. Shortly after I commented last week about his big fish story, Parker promptly invited about 35 of his friends to a fish fry and most of them have managed to mention to me something about all those fish and how good they were! OK Mr. Mailman, you win this round, but I ain't giving up completely.

The City Council has finally gotten around to talking about getting some of the Federal money to make improvements in our town. I share the concern of Councilman Sam Sawyer that "The money has got to go out sometime." Santa is wearing ragged clothes again this year. You know, everybody talks about new ways of capturing solar energy. Well, soap captures solar energy and turns it into useful cleaning power.

By DR. BARRY COMMONER
Biochemistry Professor, Washington University and Chairman, Scientists Institute for Public Interest

You know the oil companies have been very busy blaming people, lots of people, for what's been happening.

Blaming the People

As you know, they've blamed the oil companies for having blocked the drivers and wells and refineries. The Alaska pipeline was held up, etc., etc. And there's no brilliant technical achievement, there are palm trees, cotton trees, that know how to capture energy from the sun, put it together, make fat that turns into soap, and that was nice.

And in Oregon, we all have to stop to wash our clothes and do other things with it, using captured solar energy for this fine human value.

Defining the Problem

They blame the Arabs for the embargo, and they're having a fit for having outraged the Arabs.

And then they blame us all for wasting fuel.

Auntie and Soap

But let me tell you who they've been blaming a few items. In the first place, they left out the auto companies.

The auto companies have along with the oil companies

been very busy detergents

and what's been happening

is that the detergent came

along with the oil companies

that were making soap.

Soap, I want to tell you, is a familiar product. You know, everybody talks about new ways of capturing solar energy. Well, soap captures solar energy and turns it into something useful, cleaning power.

So, how do we do it? Well, soap is made of fat. Fat is a complicated molecule which has to be put together, reactions by using acids and bases. And another brilliant technical achievement, there are palm trees, cotton trees, that know how to capture energy from the sun, put it together, make fat that turns into soap, and that was nice.

And in Oregon, we all have

to stop to wash our clothes

and do other things with it,

using captured solar energy

for this fine human value.

CO-OP Annual Meeting

Tom Casday, County Extension Chairman

The Southeast Regional Meeting of the National Association of Conservation Districts (NACD) will be held this past July 14-16, in Louisville, Kentucky. Attending the meeting from Alabama will be Mr. and Mrs. Martin Sanders, Roeton Community, and Mr. and Mrs. Martin Moates, County Line.

One of the key topics discussed at the meeting was "Land-Use Planning." NACD opposes the proposed National Land-Use Bill that came before the House of Representatives.

The growth of our nation has been aided by the rights of it's citizens to own land. In early days of our nation when land was plentiful, the use of the land was determined solely by its natural resources. Naturally, this contributed greatly to our growth, economically speaking.

Today we know the sum total of our land resources has been heavily overused.

It is damaging, polluting and

actually robbing this nation of its resources.

We are faced with

a threat of future damage to our environment.

The National Association of Conservation Districts (NACD) is in favor of some land-use bill that will protect our resources, but feels that the proposed National Land-Use Bill is not good for Coffee County.

Soil conservation officials stated registration of members would begin at 5:30 p.m., with the entertainment program starting at 6:30 p.m. with a dinner session at 7:15 p.m.

Features speaker for the meeting will be Mr. Strong, President and General Manager of the Kentucky Association of Electric Cooperatives, Inc., operating in the United States Supply Cooperative, a material supply and construction firm, headquartered in Louisville, Ky.

Mr. Strong immediate Past President of the National Rural Electric Cooperative Association, is widely recognized for his speaking ability, which includes a rib-tickling sense of humor.

Entertainment will also be provided by Mr. Haywood and The Singers "On Stage."

This group combines a rare blend of music and humor in their personal appearances.

The second day of the meeting, the "Ratzenbach" has surpassed a million in sales.

They were also recipients of a special award from the State Department following overseas appearances they made at the request of the government.

Some 30 electrical appliances, including a 23' tandem trailer, will be awarded as attendance prizes. In addition, each top three contestants will receive a free gift.

During the business session, Covington Electric reported operations of the Cooperative, and elect two members to three-year terms on the Board of Trustees.

Covington stands will be open during the meeting.

On the third day of the meeting, there will be a free gift.

There is no charge for this meeting. Come and bring a friend with you.

For those of you who are interested in learning more about ways to cook pork, you will want to attend a pork cookery demonstration at the Elba Drug Co. on Thursday, July 25.

This will be the first time in the history of the state that a pork cookery demonstration will be held at the Elba Drug Co.

The demonstration will be held at the Elba Drug Co. on Thursday, July 25.

There will be one demonstration at 10:00 a.m. and one at 7:30 p.m.

The demonstration will be held at the Elba Drug Co. on Thursday, July 25.

There will be one demonstration at 10:00 a.m. and one at 7:30 p.m.
